

Overview

School Overview

k12pages is a remotely hosted Internet service that provides schools the tools to create, maintain, and communicate through a dynamic school website. Please refer to the attached list of features to learn more about the power of **k12pages**.

District Overview

A district-level version of **k12pages** is in development and is projected for release in late 2007 or early 2008. District-level software will contain all features that are available to school sites and will fully integrate with any existing **k12pages** school site.

File and Data Storage

k12pages uses mySql to store data. Graphical files, attachment files, and pdfs are stored in their original format unless otherwise noted.

Student Information

The features of **k12pages** do not require the importation or creation of any personal student information. Schools choosing to upload student grades via Easy Grade Pro® may do so using pseudonyms and student codes.

Hosting Facilities

k12pages contracts with Lunar Pages for its server needs. Lunar Pages maintains over 2,500 web servers in two state of the art facilities, and employs over 100 professionals to keep hardware up and running. For more information about Lunar Pages go to <http://www.lunarpages.com/about/>.

Server Maintenance / Data Backup

All server maintenance, security, system upgrades, and data backup is performed by **k12pages**.

User System Requirements

Hardware – Any Internet capable computer

Connectivity – Internet access at 56kb or greater

Software

- Viewing - Most web browsers are compatible with **k12pages** for viewing.
- Content Authoring – Mozilla Firefox is required to access the full range of web authoring tools.

Server System Requirements

No server is required. **k12pages** is a hosted service.

Webmaster Knowledge Base

The webmaster of each site should have some experience and understanding of web site construction, including basic HTML, basic CSS (particularly the “box model”), and creation of links.

Content Creation

k12pages is a hosting service that provides the framework for web page construction. **k12pages** does not create, transfer, or convert new or existing content for its users.

Add-Ons and Customization

k12pages is committed to creating a diverse communications suite that will meet the needs of your educational community. If you have any needs or ideas that are not found on **k12pages**, please feel free to discuss these ideas with us. **k12pages** reserves the right to determine which add-ons and features it develops and the timing of such releases. Add-ons, upgrades, and new developments are implemented automatically under the Hosting Services Contract at no additional fee. Please be aware that all suggestions and ideas shared with **k12pages** become the property of **k12pages** to do with as it wishes, and **k12pages** cannot and will not offer compensation of any kind for ideas or suggestions. Please refer to the Terms of Use for more information.
